VYHLÁSENIE O PARAMETROCH

DoP 0291
pre fischer Drop-in Anchor EA II (mechanická kotva do betónu) SK

1. Jedinečný identifikačný kód typu výrobku: **DoP 0291**

2. Zamýšľané použitie/použitia: **Dodatočné upevnenie v betóne bez trhlín, pozri prílohu, najmä prílohy B1-B3.**

3. Výrobca: **fischerwerke GmbH & Co. KG, Klaus-Fischer-Str. 1, 72178 Waldachtal, Nemecko**

4. Splnomocnený zástupca: **–**

5. Systém(-y) posudzovania a overovania nemennosti parametrov: **1**

6. Európsky hodnotiaci dokument: **EAD 330232-01-0601**
   Európske technické posúdenie: **ETA-07/0135; 2021-10-20**
   Orgán technického posudzovania: **DIBt- Deutsches Institut für Bautechnik**
   Notifikovaný(-é) subjekt(-y): **2873 TU Darmstadt**

7. Deklarované parametre:

Mechanická odolnosť a stabilita (BWR 1)

Charakteristická odolnosť v ťahu (statické a kvázistatické zaťaženie) Metóda A:
Odolnosť voči porušeniu ocele: Prílohy C1
Odolnosť voči porušeniu vytiahnutím: Prílohy C1
Odolnosť voči porušeniu betónového kužeľa: Prílohy C1
Robustnosť: Prílohy C1
Minimálna vzdialenosť od okraj a osová vzdialenosť: Prílohy B2
Vzdialenosť od okraja voči rozštiepniu pri zaťažení: Prílohy C1

Charakteristická odolnosť v šmyku (statické a kvázistatické zaťaženie), Metóda A:
Odolnosť voči porušeniu ocele: (Zaťaženie šmykom) Prílohy C2
Odolnosť voči vylomeniu: Prílohy C2

Charakteristická odolnosť pre zjednodušený návrh:
Metóda B: NPD
Metóda C: NPD

Posuny:
Posuny pri statickom a kvázistatickom zaťažení: Prílohy C3

Charakteristická odolnosť a posuny pre seizmické výkonnostné kategórie C1 a C2:
Odolnosť pri zaťažení ťahom, posuny, kategória C1: NPD
Odolnosť pri zaťažení ťahom, posuny, kategória C2: NPD
Odolnosť pri zaťažení šmykom, posuny, kategória C1: NPD
Odolnosť pri zaťažení šmykom, posuny, kategória C2: NPD
Faktor prstencovej medzery: NPD

Bezpečnosť v prípade požiaru (BWR 2)
Reakcia na oheň: Trieda (A1)

Odolnosť proti ohňu:
Požiarna odolnosť voči porušeniu ocele (Zaťaženie ťahom) NPD
Požiarna odolnosť voči vytiahnutiu (Zťaženie tahom) NPD
Požiarna odolnosť voči porušeniu ocele (Zaťaženie šmykom) NPD

životnosť:
životnosť: Prílohy A3, B1

8. Vhodná technická dokumentácia a/alebo špecifická technická dokumentácia: **–**

Uvedené parametre výrobku sú v zhode so súborom deklarovaných parametrov. Toto vyhlásenie o parametroch sa v súlade s nariadením (EÚ) č. 305/2011 vydáva na výhradnú zodpovednosť uvedeného výrobcu.

Podpísal(-a) za a v mene výrobcu:

Dr.-Ing. Oliver Geibig, konateľ oddelenia Produkt management & vývoj

Jürgen Grün, konateľ oddelenia Chemická výroba & kvalita

Tumlingen, 2021-10-27

Toto vyhlásenie o vlastnostiach bolo vyhotovené v rôznych jazykoch. V prípade, že dôjde k rozdielnemu výkladu má anglická verzia vždy prednosť.

Príloha obsahuje dobrovoľné a doplňujúce informácie v anglickom jazyku. Tieto vychádzajú zo zákonom stanovených požiadaviek (jazykovo neutrálnych) .

Specific Part

1 Technical description of the product

The fischer drop-in anchor EA II is an anchor made of galvanized or stainless steel which is placed into a drilled hole and anchored by deformation-controlled expansion.

The fixture shall be anchored with a fastening screw or threaded rod.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

Essential characteristic	Performance
Characteristic resistance to tension load (static and quasi static action) Method A	See Annex B2 and C1
Characteristic resistance to shear load (static and quasi static action)	See Annex C2
Displacements and Durability	See Annex C3 and B1
Characteristic resistance and displacements for seismic performance categories C1 and C2	No performance assessed

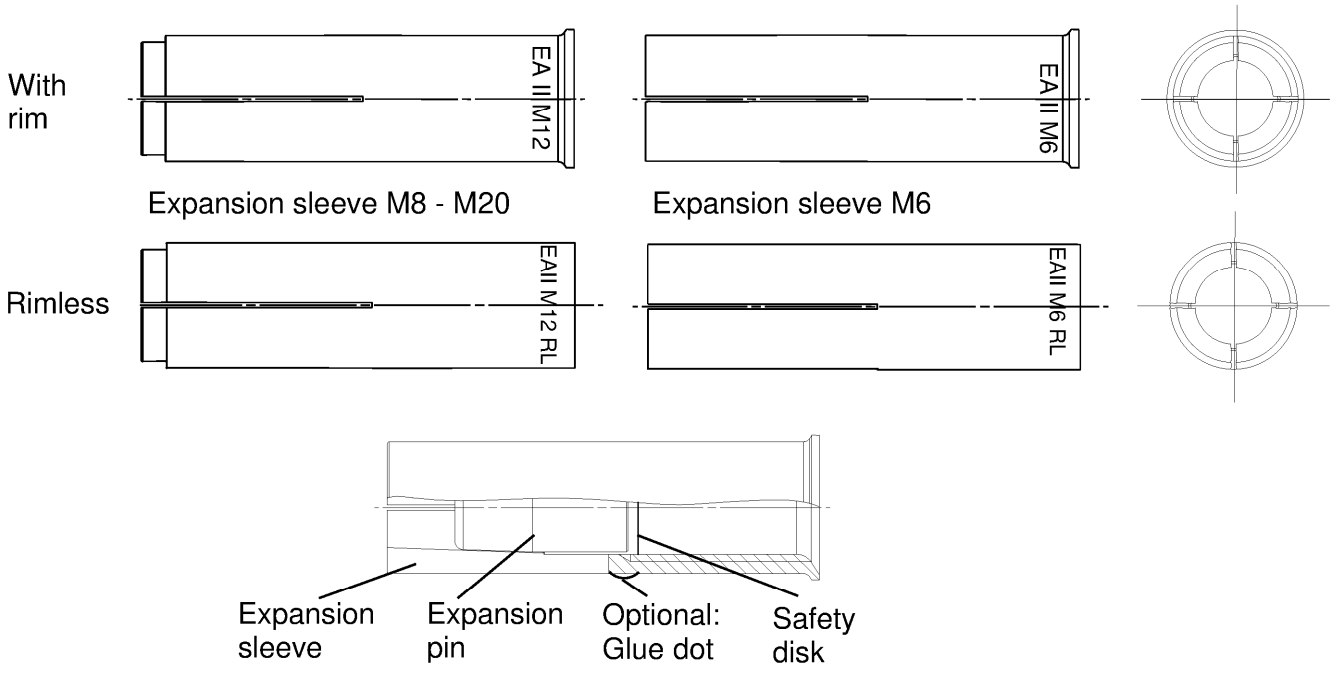

3.2 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Class A1
Resistance to fire	No performance assessed

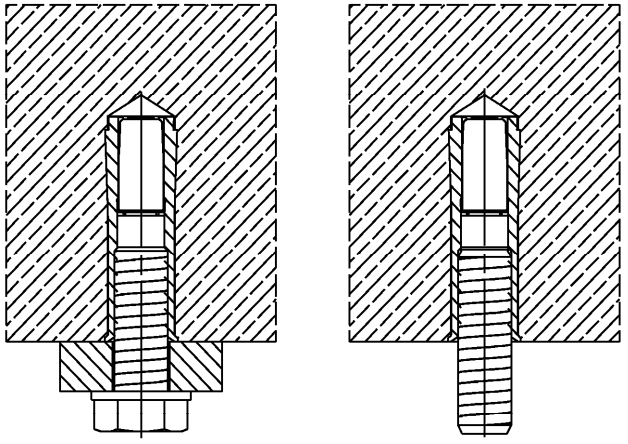

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with the European Assessment Document EAD 330232-01-0601 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

Intended use in concrete

Specifications of intended use

Anchorages subject to:

fischer drop-in anchor EA II (all versions)			M6	M8	M10	M12	M16	M20
Hammer drilling with standard drill bit 			All types					
Hammer drilling with hollow drill bit with automatic cleaning 								
Material	Steel	Zinc plated				✓		
	Stainless	R				✓		
Static and quasi-static loads						✓		
Uncracked concrete						✓		

Base materials:

- Reinforced or unreinforced normal concrete without fibres of strength classes C20/25 to C50/60 according to EN 206:2013+A1:2016

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions: **EA II, EA II R**
- For all other conditions according to EN 1993-1-4:2006 + A1:2015 corresponding to corrosion resistance class CRC III **EA II R**
  Anchor types M6x30 R, M8x30 R and M10x30 R only for dry internal exposure

Design:

- Anchorages are to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Design of fastenings according to EN 1992-4:2018 and Technical Report TR 055, Edition February 2018
- Anchor sizes M6x30, M8x30 and M10x30 for statically indeterminate structural components only, when in case of failure, the load can be distributed to other fasteners.

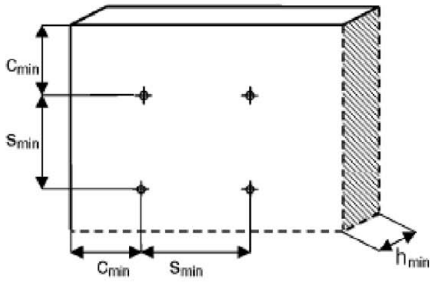

Installation:

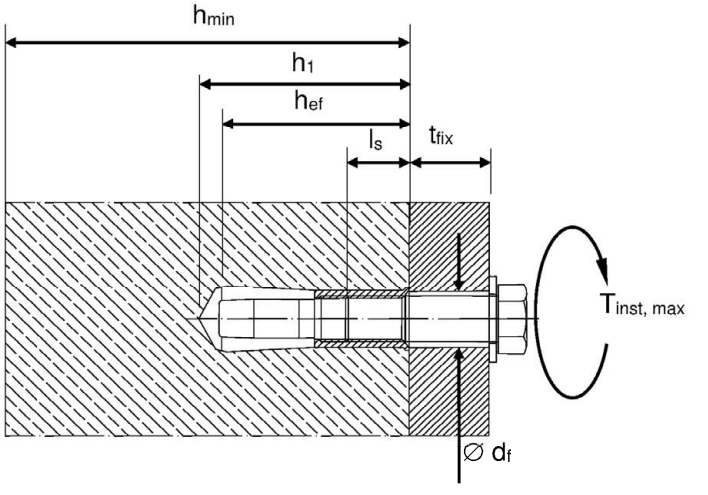

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Create drill hole with hammer drill or with hollow drill and vacuum cleaner
- The anchor may only be used once
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar (e.g. FIS EM Plus, FIS SB or FIS V Plus) and only if the hole is not in the direction of the oblique tensile or shear load
- Anchor expansion by impact using the setting tools given in Annex A 4. The anchor is property set if the stop of the setting tool reaches the expansion sleeve. The manual setting tool with installation control leaves a visible mark on the sleeve, as illustrated in Annex A 4 and B 3

Minimum edge distance	c_{min}		115	115		140	150	200		240	280

[1] No performance assessed

Fastening screw or threaded rod:

- Minimum property class and materials according to table A3.1
- The length of the fastening screw or threaded rod shall be determined depending on thickness of fixture t_{fix}, admissible tolerances and maximum screw-in depth $l_{s,max}$ as well as minimum screw-in depth $l_{s,min}$

Installation instructions

No.	Description
1	Create drill hole with hammer drill or stop drill or with hollow drill and vacuum cleaner (e.g. fischer FVC)
2	Clean from drill-dust
3	Set anchor till anchor is flush with surface of concrete
4	Expand the sleeve by driving the pin with the corresponding setting tool into the sleeve and control the correct setting
5	Fixation of fixture. Maximum installation torque $T_{inst,max}$ must not be exceeded
